Arrest rate	5.61	4.82	12.58	10.63	1.16	0.00	0.00

Notes: Population figures are 2005 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Agency response

The City of Gladstone has three state highways and one interstate highway that run through the area. In addition, there is a major home improvement center located in the southwest corner of the City. This center draws retail business from throughout the area including residents from the State of Kansas. It is located in close proximity to three of the four highways that run through Gladstone. It should also be noted that the City of Gladstone is entirely landlocked by Kansas City, Missouri, with major thoroughfares that allow through travel by Kansas City residents. A review of the data submitted shows that 13.9% of the Blacks, 12.5% of the Hispanics and 19.7% of the Asians that my officers came into contact with occurred during stops on the highways that run through our city. In addition, we believe the data collected should include resident status to provide an accurate reflection of our community at large. Considering the boundaries of Gladstone, the surrounding areas and highways described would indicate that a large proportion of the drivers stopped in all races are not Gladstone residents. If this information was being utilized in the calculation of the disparity index, which measures against the community's population figures, then the disparity index should drop proportionately and reflect that there is not a disparity in Gladstone.
